Dear Student,

Congratulations on your acceptance into the Master of Engineering Management at Ohio University! As a member of the OHIO community, you are joining 32,300+ current Ohio University students and 179,000 alumni who have received an education from a Tier 1 institution that is consistently ranked in the top 2% of American public universities. The Fritz J. and Delores H. Russ College of Engineering and Technology at Ohio University in Athens, Ohio currently enrolls approximately 1,300 undergraduate and 300 graduate students into programs across engineering spectrum. Nationally recognized for its world-class research and scholarly activities, the Russ College is also home to the Russ Prize, the top bioengineering prize in the world. We are excited that you will be joining our program and developing your managerial background while you use and expand your engineering experience.

As an Ohio University Master of Engineering Management student, you will be taking 10 classes which will equip you to lead highly effective engineering teams. Topics include engineering statistics, Six Sigma, quality & information systems, project management, engineering writing, and managerial decision making analysis. Through our application-focused education, you will also be completing a capstone project related to your career to help you integrate the competencies you gain from this program into your workplace. With our hands-on faculty, we will be guiding you through these courses and developing your versatility in the market with coursework and syllabi designed to teach practical, relevant project leadership skills through the perspective of engineering.

OHIO students and alumni share an unrivaled pride in their university and we recognize that the promise lives in the accomplishments in this community. Welcome to the Bobcat pride!

Sincerely,

David Koonce, Ph.D.
Program Director
